

to whom it may concern

dear Sirs:

as member of a community radio station in my home town. I am gladden to hear there is to be a stronger statement of support and respect for the creation of the LPFM movements by the fcc. the people at the Fcc should be glad of what they did to increase the availability of free local radio.. it is what separates america from the rest of the world our loyal unities and governmental support to insure freedom for everyone.

you may not even know what you have done, but you have give communities a greater voice to help educate, to help inspire.

At our Station, we are planning to provide entertainment not for just an attraction of audience, we will provide yet a difference, with education , and socially responsive media. as in one idea a community member spoke of the other night, having a late night AA show.. the smaller market could help a lot of people through the spreading of communication toward our local problems and disagreement.

i am writing this because the future must be insured against raging innocence of a market driven Media. the causes of the average man is not the escapes propaganda of the rich and intoxicatedly enlightened. We must have full ideas and disclosure,, we need good communication.

also ,, as a last part. If there was a terrorist attack our local call stations would do everything possible.. to fill the gaps of major parties,, and we could have given instructions to the insurgents to help defend.
